EDUCATION

Toronto Metropolitan University (*formerly Ryerson University*)

Bachelor of Science in Computer Science, Co-op

- Faculty of Science Deans List: 2022 – Present

Toronto, Ontario

Sep 2022 – Apr 2027

EXPERIENCE

Software Engineer: Full Stack Intern

Jan 2026 – Present

Super.com

San Francisco, CA

- Delivered **P0** full-stack features using TypeScript, XState state machines, and backend APIs for card/subscription management
- Triaged Datadog error logs and shipped experimentation-driven features across fintech services supporting **1,000+** req/s
- Implemented experimentation framework with user bucketing, variant testing, and Amplitude events to drive product decisions
- Wrote production-ready code and deployed with GitLab CI/CD on AWS Kubernetes infrastructure, maintaining **99.9%+** uptime

Software Engineer: Backend & Automation Intern

May 2024 – Aug 2025

IBM

Toronto, ON

- Developed and tested software for IBM Supply Chain Intelligence Suite's Provisioning, User Management, and Access Control team using a Microservices Architecture with Java, Spring Boot, Kafka, Redis, and Cassandra
- Engineered microservices designed to simplify user access control and group management within the software. The microservices streamlined the process of assigning users to groups, managing permissions and ensuring secure access to features and data
- Designed, developed, and deployed a Kafka monitoring microservice using Kubernetes on IBM Cloud and Docker, enabling real-time consumption and tracking of over **5 million** events daily across **10+** microservices. Reduced manual monitoring efforts by **40%** and integrated the service with Instana dashboards through REST APIs, providing actionable insights into microservice health and performance
- Implemented REST APIs and enhanced existing ones with advanced features such as cursor/offset-based pagination, retry mechanisms, caching strategies, and JWT authentication. These improvements drastically increased performance, resulting in scalability, strengthened security, and a **65%** reduction in response times
- Created integration and unit tests using JUnit, Mockito and Karate ensuring reliable software and API functionality and streamlined the testing processes with automated pipelines in Jenkins

Software Engineer: Full Stack

Jan 2024 – April 2024

myAIpathway.ORG

Toronto, ON

- Worked as a Full Stack developer on an e-commerce platform for local farmers to sell their products online; utilizing Next.js, Tailwind and Typescript for the frontend and Node.js, Express, AWS RDS and JavaScript for the backend
- Architected and deployed a Node.js based SMTP email microservice using Nodemailer and AWS SES to deliver **5,000+** monthly order confirmations, shipping updates, and account notifications; integrated dynamic Handlebars templates and webhook-driven delivery tracking, cutting customer support inquiries by **60%**

PROJECTS

SchoolMule: AI Student Management | *TypeScript, Next.js, Node.js, Express, PostgreSQL*

September 2024

- Developed a full-stack web application using TypeScript, Next, Node and Express, enabling schools to manage student records, track grades, and generate automated report cards, reducing administrative workload by over **2000** hours annually
- Orchestrated adoption by **4** underfunded private schools with over **2,000+** students, handling end-to-end deployment and infrastructure on AWS; migrated and validated legacy student data, delivered hands-on training workshops and tailored user guides and demos for over **150** teachers

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML/CSS, TypeScript, C/C++, SQL, Rust, Bash

Frameworks: Spring, Spring Boot, Flutter, React, Next.js, Angular, Node.js, Express, Flask, Django, GraphQL

Developer Tools: Git, Docker, AWS, Jenkins, Kafka, Redis, Kubernetes, Linux/UNIX
